48	1219	170	77.2	47.25 to 47.75	1200.2 to 1212.9		

10 Inch (T-Handle Optional)

LIGHTWEIGHT AND EASY TO INSTALL

Because Foreman Nite Caps are made of lightweight metal, one man can install a 30 inch model without assistance. A few turns of a single bolt force disc plates together, pressing a rubber gasket against pipe walls as a barrier to unwanted items. Foreman Nite Caps, however, are not pressure holding devices.

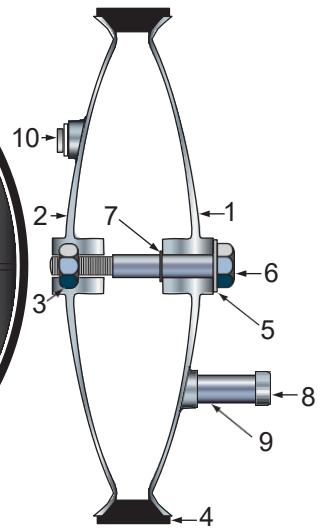

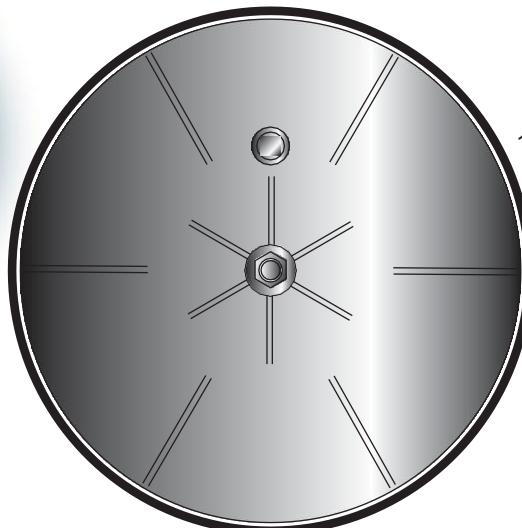

ECONOMICAL

Foreman Nite Caps outperform inefficient caps, sacks, sheet iron plates and canvas covers, and are reusable indefinitely. Replacement parts such as gaskets and other components are available.

Venting plugs are standard features on all but the smallest Foreman Nite Caps and are used to relieve the pipe of any naturally occurring pressure buildup.

PARTSLIST		No. Required
Item No.	Description	
1	Outer Disc	1
2	Inner Disc with 1 Inch Nut	1
3	Hex Nut Cast into Item 2	1
4	Rubber Gasket	1
5	Steel and Fiber Washers	1
6	Hex-Head Bolt	1
7	Retaining Ring for Bolt	1
8	Pipe Cap	1
9	Pipe Nipple	1
10	Pipe Plug	1

48	1219	181	82.2	48.5 to 49	1231.9 to 1244.6

RUGGED

Field tested by major companies and practical pipeliners, Foreman Nite Caps have been proven both durable and long-lasting. The rubber used on the Foreman Nite Caps can withstand a temperature range from -40 °F to 260 °F. These Foreman Nite Caps can also be vented when desirable.

WIDER RANGE OF PIPE IDs

Now covering a wider range of pipe ID's, Foreman Nite Caps can be used for most 1/2" thick casings, as well as other casings like SDR pipes, or even metric. All of these are possible with the addition of a new rubber extrusion from APS. Check tables for details.
